am-fm in our area is garbage and getting worse. with the exception of wrn you have to be either a moron or deperate to listn to the offerings- used to be different. sattelite allows comedy, broadway shows,old radio shows etc, does not bombard you with noise(sorry music) and you have a real choice of news.

i prefer not to change systems just for traffic and weather so lets start practicing what you (our gov't) preaches-competition. let the best man win-not the best lobby who has the poltician who has been bought.

let sattelite broadcast weather and traffic. thank you
